Mr. Imran Rahimov

Baku, Azerbaijan **M**: +99470 2215209   **E**: mr.rahimov.imran@gmail.com

---

Summary : I am a highly skilled developer with 6 years of experience in IT, starting as an IT assistant and continuously growing my expertise. I am passionate about driving business impact by solving complex problems, automating processes, and delivering scalable solutions. I thrive on challenges and am committed to learning and improving my skills to stay at the forefront of technology.

Work History

Webpro (webpro.az) - Baku, Azerbaijan
Python Backend Developer – *October 2023 - present* (Part-Time)

- Led the design and implementation of the **backend architecture** for key projects like **bonyo.az , acriera.com** and **b2club.az**, , ensuring high performance, scalability, and reliability across the platform.
- Built and maintained **web applications** using **Django REST Framework (DRF)**, defining **serializers**, **views**, and **API endpoints** for seamless data retrieval, creation, updates, and deletion.
- Configured and optimized **PostgreSQL databases**, designing efficient schemas, writing complex queries, creating indexes, and improving database performance through careful tuning and optimization.
- Integrated **payment systems** and various **third-party services** such as **OTP** (one-time passwords) and **OneSignal** for notifications, enhancing the user experience and operational efficiency.
- Developed a **multi-user system**, allowing the platform to support multiple user types with different permissions and access levels.
- Automated critical business processes by developing **custom bots**, which bypassed security systems like **Cloudflare**, enhancing task efficiency and reliability.
- Managed server infrastructure, performing regular **backups**, **data dumps**, and **PostgreSQL tuning** to ensure smooth operations and data integrity.
- Configured and maintained **GitLab CI/CD pipelines**, deploying the applications to **servers**, ensuring continuous integration and seamless deployment.
- Use **AWS Lambda** for specific cases.
- Coordinated project workflows within the team, ensuring efficient communication and timely delivery of milestones.

Global Logistics (glb.ge) - Georgia
Software Engineer – *July 2023 - October 2023* (Project Based)

- Engineered custom **microservices** for scraping and processing data from platforms like **Copart**, **IAAI**, and **Manheim**, using Selenium.
- Developed a **Chrome Extension** that automated the **login process** to auction platforms like **Copart**, **IAAI**, and **Manheim**, allowing users to control access to multiple accounts from a single login point.
- Integrated features to **hide sensitive account information** for enhanced privacy during auction sessions, ensuring secure user experiences across all platforms.
- Implemented functionality to **track user bids** and capture detailed records of all **user actions** during auctions, providing comprehensive data for internal reporting and analysis.
- Built and maintained **backend services** using **Django Rest Framework (DRF)** to manage data collection and synchronization between the extension and the server.
- Implemented **Sentry** for real-time error tracking, ensuring timely detection and resolution of any performance issues in the extension and backend.

Bionet (bionet.az) - Baku, Azerbaijan
Software Engineer – *February 2023 - July 2023* (Project Based)

- Developed a custom service for **166 Cargo**, a logistics company, to streamline warehouse operations and improve overall business processes.
- Built an **OCR-based system** to recognize and extract data from images of cargo packages, including user IDs and tracking numbers, automating data entry and reducing manual work.
- Created a custom script to interface with **digital scales**, enabling automatic capture of package weights and transferring the data via **REST API** to other internal systems for processing.
- Integrated the service into **166 Cargo's** larger logistics management infrastructure, ensuring smooth data flow and real-time tracking across the company's systems.

VR production (vrproduction.az) - Baku, Azerbaijan
Full Stack Developer – *January 2022 - January 2023*

- Developed and maintained several **RESTful APIs** using **Django Rest Framework (DRF)**, enabling smooth data exchange between front-end interfaces and back-end services for customer-facing applications.
- Built **landing websites** tailored to specific customer needs, focusing on **responsive design**, **performance optimization**, and **SEO** strategies, resulting in improved search engine rankings and higher conversion rates for clients.
- Led a data scraping initiative for a **travel-related project**, successfully extracting and processing over **20 million records**, which were stored and managed efficiently in a **PostgreSQL** database.
- Worked on an internal **CRM tool** focused on **SMM-specific features**, automating social media management processes, and enhancing the system's user experience by integrating streamlined workflows and reporting functionalities.

Azerbaijan National Museum of Art (nationalartmuseum.az) - Baku, Azerbaijan
System Administrator / Software Engineer – *September 2020 - January 2022*

- Managed server infrastructure, including **Linux/Windows servers**, ensuring continuous uptime for all museum-related applications and web services.
- Developed and maintained a web-based application allowing guests to assess **exhibits** and interact with digital services using **Django**, and **HTML/CSS**.
- Designed and developed a comprehensive **website** for the museum, featuring an extensive **gallery system** that could automatically manage and optimize image sizes for faster loading times and enhanced user experience.

Skills

- Python
- Javascript
- Django
- DRF
- Django Channels
- FastApi
- Selenium
- Requests / BeautifulSoup
- Celery

- Pytest
- Linux Debian
- Docker
- Sentry
- PostgreSQL
- Redis
- MongoDB
- ELK Stack
- Sentry

- Git
- CI/CD
- Jira
- HTML
- CSS
- Bootstrap
- Tailwind CSS
- React (beginner)
- SOLID

Education

- Information Security, Odessa National Academy of Telecommunications, Ukraine - 2013-2017

Languages

- **Excellent -** Azerbaijani, Russian, Turkish
- **Intermediate –** English
